MECHANICAL & ELECTRICAL ENG.,

GRAD. FROM THE NATIONAL UNIVERSITY OF ATHENS

DR'S DEGREE IN ENGINEERING IEEE LIFE MEMBER

127 BOUSGOU STREET GR - 114 73 ATHENS GREECE

## STATEMENT

Athens, February 15, 2009.

I declare that the amendments made on my original invention do not include new matter. Specifically:

The abstract, the drawings 2/7, 4/7 through 7/7 and the specification (pages 1 to 11) remain the original ones.

On drawings 1/7 and 3/7 the indication numbers (within circles) 29, 30, 31 have been inserted for reference reasons of the text.

Regarding the state of the art on the subject matter of my invention I have added to the original specification (at the end, page 12), an amendment describing the new technology used by Brown et al. This technology was not known to me at the time I prepared my application for the international phase. So, I did not mention it in my original description.

The first paragraph of the 'claim page' is rephrased according to the above mentioned amendment to the description. The second paragraph of the 'claim page' contains purely claimed items, with detailed references to the original text.

The inventor

A handwritten signature in black ink, appearing to read "N. C. Karyambas".
